

Dear Sir:

I experienced BPL in the Briarcliff, NY test, and saw first hand that BPL makes Hf and emergency communications unusable. You cannot allow the destruction of HF and emergency communications throughout the country that BPL will bring on. Experience BPL yourself at one of the test sites before you allow this monstrosity to exist. We will never be able to recreate the airwaves we have now if this goes forward.

Thank you

Charles L Starke MD FACP
